

ALUMINIUM SLIDING DOORS

The Aluminium Sliding Patio Door system has been designed to meet current and future building regulations, in addition to market-leading features such as our super-slim sightlines. Compliant to PAS24 certification, the aluminium sliding patio door has u-values of just 1.2 W/(m²k) when combined with highly energy efficient glass.

The aluminium sliding patio door is constructed using the high-quality 4900 Hi Sliding profile from Cortizo, fitted with double or triple glazed units.

STUNNING AESTHETICS

Offering unparalleled visibility with sleek sightlines, the doors offer a minimalist design that complements multiple architectural styles. From sleek and modern to more traditional settings, the doors add an element of sophistication to any property.

AT A GLANCE...

- » Fully beaded system
- » U-values from 1.0 U/m²K

UNIQUE SOLUTIONS

Our aluminium sliding patio doors are the ideal solution for any project.

The versatile system can be uniquely tailored to your custom specification, to ensure the perfect fit and function in every property. With the ability to accommodate varying numbers of panes, impressive sizes and preferences for sliding and fixed panes, the opportunities are endless.

Maximum Performance

Crafted specifically for the UK market, our patio doors are expertly engineered to utilise solar gain in summer months, and maximise thermal efficiency in winter.

Featuring dual water channelling levels and with pre-gasketed bead, they boast a resilient seal and enhanced drainage capability. The doors also require minimal upkeep while delivering exceptional strength and durability.

Highly resistant to corrosion, they remain weatherproof without painting or staining, ensuring they never rot, peel or flake.
